

October 30, 2020

Dear Residents, Families and Staff,

We want to thank you for your support as we continue to address the ongoing challenges of this pandemic.

As of today, Cedarbrook's outbreak status has been officially cleared by Toronto Public Health. This is a testament to the incredible commitment in demonstrating infection prevention and control measures as well as the hard work, dedication and commitment from our staff in making sure that our Community is safe and healthy for all.

Effective Monday, November 2<sup>nd</sup>, the following will be implemented and continued:

- regular operations in our main dining room including previous seating times will resume
- Small group activities will be hosted, residents are encouraged to practice social distancing and follow floor markers
- Visitors- **see attached Visitation Guidelines- High Alert Status & Surgical/Procedure Mask Poster**
- Ongoing active screening for all staff and visitors upon entering and exiting the home
- Ongoing active screening for all residents twice a day including temperature checks
- Universal use of mask and face shield will be worn by all staff
- Residents Absences- (see attached ORCA document)

As COVID-19 cases increase throughout the city, let us all continue to social distance throughout the building including the elevators, wear a mask in common areas, practice hand hygiene and respiratory etiquette, and report any developing symptoms (see attached) to reception at 416-431-6400 to whom will direct you to the Nurse on duty.

We want to give a special thanks to our hospital partner- Scarborough Health Network for their additional support.

Please join us in recognizing our Cedarbrook team for the incredible work they do and the difference they make in the lives of our residents. We send each of our team members a deep and heartfelt thank you.

Stay Safe,  
Your Management Team
